

WEST TEXAS AVIATION WEATHER SAFETY WORKSHOP (WTAWS) 2026

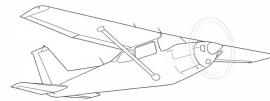

Master the Skies: Insights from the Experts

The Mission

Join your fellow aviators for an evening dedicated to sharpening your weather situational awareness. Whether you are a student pilot or a seasoned ATP, this workshop covers critical West Texas phenomena that impact your flight safety—you will learn something.

Flight Plan (Event Details)

- DATE: **Tuesday, February 10, 2026**
- TIME: **6:00 PM – 9:00 PM**
- LOCATION: Science Spectrum – Science Stage
- ADDRESS: 2579 S. Loop 289, Lubbock, TX
- ACCESS: Please use the South Entrance off 74th Street.

Briefing Topics

Our presenters will provide actionable intelligence on:

- Structural Icing: Recognizing and escaping hazardous accumulation.
- The Human Element: Insights from weather observers.
- Digital Pre-Flight: Leveraging modern internet resources for superior flight planning.
- Obstructions to visibility: Identifying and mitigating low-visibility hazards

Refreshments graciously provided by EAA Chapter 19
